Taber's Cyclopedic Medical Dictionary: 20th Edition (Thumb Index)
Why is TABER’S 20th Edition the ONLY CHOICE for your students? Because for more than 65 years, Taber’s has provided students and practitioners with the definitions and information they need to provide superior care for their patients: 56,000 definitions with 2,400 brand new to the 20th edition almost 50% more than our nearest competitor. More than 6,000 revised terms. 700 superior illustrations with more than 500 in full color. 100 more Patient Care sections. NEW! Cautions statements added to almost 350 terms bold and in a second color. New and revised appendices, including Nutrition, Complementary Medicine, and Appendix 13, which explains the roles of the Health Professions health care team members. NEW! Improved placement of multi-word entries (for example, Chronic Obstructive Pulmonary disease and Irritable bowel syndrome are now listed in natural word order). NEW! Almost 30,000 pronunciations of new and current terms. More colorful interior design. NEW! Easier to understand definitions. NEW! New and revised terms in Taber’s 20th Edition give your students the answers at their fingertips, such as: Cephalostat Andropause Film speed Pulmonary interstitial emphysema Magnetic resonance angiography Complementary and alternative medicine definitions keep your students at the forefront of care: Stress management Flaxseed oil Glucosamine Patient Care Statements offer clinically pertinent information on such conditions as: Acute respiratory distress syndrome Fracture Myasthenia gravis New and revised illustrations and tables complement the text and strengthen students’ understanding of the terms: Cheyne-Stokes respiration Prostate cancer Paranasal sinus Important Considerations in Palliative Care We recruit top educators and practitioners from virtually every health profession to make sure the information is relevant and accurate. This is just one more way we make certain that Taber’s provides your students with the best, most up-to-date reference. The Proven Choice Since 1940. "Taber’s is the best. I’ve used it for over 20 years. It has been selected by our faculty as a required resource for our students." -- Gwena Pollard, RN, BC, BSN, Hannibal Public School of Practical Nursing, Hannibal, Missouri "Couldn't have finished nursing school without it. It’s a Nurse’s Bible." -- Marilyn Runnells, LVN, LVN Program, North Orange ROP, Anaheim, California "Taber’s just keeps improving each edition -- when I think you’ve done the best you can do, you come up with another spectacular edition!" -- Brenda Phillips, RN, BSN, Southwest Technology Center, Altus, Oklahoma "I feel Taber’s is the best medical dictionary published. I have used Taber’s since I was a radiography student in 1975. I tell students Taber’s is the best. I would recommend it to anyone." -- Mike Cochran, Assistant Professor of Radiology, Southwest Virginia Community College, Richlands, Virginia "My students and I use it every single day." -- Kandace Oldroyd, RN, CNA-Med Terms, BATC, Logan Utah
If there’s a nursing “Bible” then this is it as it’s essential for nursing students. Around 90% of all the nursing books you’ll purchase are so thick that there’s no room for a glossary. Enter Taber’s, problem solved. There are many excellent reviews for you to read here. My purpose of writing is to share some of the terms that nursing students awaiting entry into nursing school should go ahead and learn as they were mentioned over and over in my first year nursing books: ADL, advance directive, adventitious, alveoli, aphasia, ascites, asepsis, aspiration, atelectasis, blanch, BP (and go ahead and learn how to take correctly,) Braden scale, bradycardia, bradypnea, bruit, BUN, cachexia, CAD, calculi, capillary refill, Cheyne-Stokes respiration, chloasma, cholecystitis, colonoscopy, colostomy, contracture, contraindication, COPD, creatinine, CSF, defibrillation, diastolic, digoxin, distention, diuretic, dysphasia, dyspnea, dysrhythmia, dysuria, ecchymosis, edema, emesis, epiglottitis, erythema, exacerbation, excoriation, febrile, flank, fundus, glaucoma, heart, Heimlich maneuver, hematuria, hemoptysis, HPV, hypertension, hypotension (orthostatic), hypoxia, idiopathic, infiltrate, insensible (loss), inspiration, ischemia, jejunocolostomy, Korotkoff’s sounds, kyphosis, leukocytosis, living will, lordosis, maceration, mastitis, MCH, MCHC, metastasis, MI, NANDA, NLN, NCLEX-RN, necrosis, Nightingale, F., NPH insulin, nystagmus, obese, oliguria, opioid, orthopnea, os, osteoporosis, otalgia, O.U.
