The Medical Marijuana Guide. NATURES PHARMACY: Second Edition
The Medical Marijuana Guide. NATURES PHARMACY, Second edition is now complete. Discover the many benefits of using marijuana as a medicine and as a complete food source. This guide helps the patient take healthcare into their own hands and this guide also helps the practitioner provide effective quality treatments that help people make a recovery. Learn how to make extractions, infusions, creams salves and balms. Learn about the benefits of eating and juicing fresh raw marijuana. Learn about cannabis cuisine and now cannabis cultivation. From seed to harvest, this guide is ideal for the beginner as it walks you thru the basics. Also for the advanced grower I teach you many techniques that will greatly improve quality and yield. Learn about the endocannabinoid system and how cannabis restores physiological balance. Learn how cannabis stimulates neurogenesis. Take healthcare into your own hands, educate before you medicate. I am a licensed medical marijuana producer, licensed under the MMAR program, issued by Health Canada. Peace And Prosperity For All. Get your copy today or gift it to someone you care about. May the guide be with you. Chef Derek Butt.
Customer Reviews

As a patient I have learned a great deal from Chef B’s new book. It bypasses all the stereotypical stoner cliches’ and approaches the subject matter with the seriousness and respect those using cannabis for medicinal reasons deserve. The book contains historical, scientific and culinary information that may be unknown to those who have inadvertently found themselves ill and in need of pre-western plant based medication. The recipes are a delightful supplement to Derek’s YouTube cooking show. Don’t think you’re only getting the played out pot brownie but rather there is a pantheon of varied foods for those who must medicate often and do not wish to have a one note diet. What impressed me most was the subject of juicing non-psychoactive / non-decarboxylized cannabis leaves for continued health maintenance. As a long term patient I was surprised to find out something I was completely unfamiliar with. Pros and neophytes alike will enjoy Nature’s Pharmacy.

(Clix Hemp from youtube) - if you can get past the many spelling errors and the grammar mistakes this book is pretty awesome. What I respected most about it is how it listed cannabis as a possible treatment for “premenstrual syndrome”. When looking around in the cannabis community there is very little discussion about woman, their periods, and medical cannabis as a treatment. Mostly because when looking for a treatment for pain relief or an ease of mood swings women are only recommend strictly on hormonal treatments and later on if worsened, surgery. Even though the description was brief it had said more than enough. This book gave me a lot of information on natural remedies for the use of the raw plant as oppose to just getting high. It opens up options rather than just trending and I really liked that about it. It was a great purchase and a great read overall. It opened up my eyes to new possibilities and even a bit of hope for future treatment.

I too was diagnosed with bipolar, depression and low testosterone. The meds were producing debilitating side effects. After reading this book and other research, I started using raw product in smoothies. I am now prescription free and feel better than I have in my life. Also cured my sleep disorder. Now eight hours uninterrupted. Great book. God bless

This book has helped me throughout my culinary endeavor, from the making of salves and topicals to juicing fresh marijuana leaves, which is the very most efficient way to utilize marijuana for medical use answering your question from YouTube. I’ve been experimenting with hemp milk and I have also successfully made canna flour to make the lovely scones I serve my guests at the bed & breakfast I work at in amazing Washington State. I am eagerly looking forward for your next book to
come out, good growing! I will also leave a more short and sweet comment on your Youtube page.

I found Dereks book to be extremely informative and very helpful. Empowering to say the least. I've a son with a seizure disorder where he loses consciousness for up to 6 hours at a time and i also had a sister die from a seizure disorder. I know this will work thanks so much Derek for the great book and video links. I wish i had known this before to help my sister and friends who have passed from seizure, cancer and blood disorders. Can't wait for your next book. Thank you for helping people care for themselves.

Excellent source of information, far more information than I had expected. Definitely a good resource for anyone who'd like to educate themselves about marijuana, it's uses, and various ways of utilization. Very easy reading, with pictures of fantastic plants, and work cited in the back, so you know where the information came from.

Hello! (i'm farschfuhrer on you tube) I am really happy because of obtaining this book. Unfortunately, in my country we don't have books on this subject. It not only gives us knowledge how to use cannabis for cooking (many useful recepies, some of them I've already tested) but already tells us about possibilities of cannabis products in treating cancer! It is also very important for me to get the ability to know all that new things about taking cannabis. Thank you so much Chef Derek for your work!

Hey this is namelessglover on youtube bought the book a while ago and all the information in there has helped me on my path to learning more about cannabis and all the benefits it can give to us. I especially liked learning about the temperatures that THC CBD CBN breakdown at for decarboxylation.
