Customer Reviews

This book is set up with a brief description of what Natural magic is followed by an encyclopedia section describing the associations, mythology, and uses of several natural ingredients. One of the neatest features of the book is that it has a last section, called the "Natural Magic Workbook". It briefly describes how to make many useful things, such as potions, soaps, satchets, and more. The book is also written from a non-denominational standpoint, leaving room for someone of virtually any spiritual path to make use of it. Overall, the book was well-written, well-organized, and is a highly recommended addition to anyone's magical library.

I have a wide range of beliefs and I am intrigued by the relationship between nature and magic. This

book was a great guide for someone like me. I have only paged through for now, but I really like the way the book was written and enjoy the way the author has presented it. I highly recommend for anyone new to Natural Magic or someone more experienced. There are some books I have for years and others I sell once I have finished on . This one will stay with me on my bookshelf for a very long time.

I have been pagan for a long time now and I also teach others in the way of magic. I found this book to be very helpful and full of great information. I really recommend this book to others!

this book is well put together and reviews details and associations so you can best use each item in any working. the workbook included is extremely informative.

Wasn't exactly what I expected. Kinda of a very brief overview of different magick practices but really even kinda of incomplete at that. A little disappointed about that but I am glad I have it as it's got a great list of different types of divination and is a useful reference book for where to start looking or what to look up elsewhere.

Enjoyed it thoroughly. I found some information useful for my path and some other information of no use. Would highly recommend to others.

I found Greer's text to be informative and easy to follow with just enough theory to avoid being another "beginner" type of text. I will be looking at his other texts to see if they can assist me in my current studies.

A GREAT READ!
