Critical Thinking Skills: Developing Effective Analysis And Argument (Palgrave Study Skills)

Synopsis

The second edition of this leading guide helps students to develop reflective thinking skills, improve their critical analysis and construct arguments more effectively. Written by Stella Cottrell, leader in the field with over 1/2 million book sales to date, this text breaks down a complex subject into easily understood blocks, providing easy-to-follow, step-by-step explanations and practice activities to develop understanding and practise your skills at each stage. Essential for students who are mystified by tutor comments such as 'more critical analysis needed', this is an invaluable tool for anyone wishing to develop advanced skills in this area and learn to apply them to tasks such as reading, writing and note-taking. Now in two-colour, this edition has been fully revised and contains a brand new chapter on 'Critical Reflection' along with additional material on essays and referencing.

This is an excellent piece of literature well worth the price. This book is a very excellent read that keeps your attention throughout its pages, it covers a vast amount of information on developing resolute thinking skills, and furthering ones fencing skills when having discourse. The book is also just as firm and sound with the development of writing skills, and though this rating is not my best writing; please do not let get past you as this book is an excellent, excellent purchase. You will not go wrong in owning a copy. If for no other reason this piece of literature would make an excellent gift

to give to someone; whom faces challenges in any of these areas. Note: I try to face my challenges head on, and so needless to say the book is aiding me in many areas. Hope that this information will be as helpful for you as it has been for me, be well.

This book is for students who need to know the ins and outs of critical thinking. An excellent book. I want it for another reason and intend to use parts of it for an adults course - not directly but to gather it with other ideas.
