The Total Outdoorsman Manual: Updated & Expanded by T. Edwards Nickens and the Editors of Field & Stream Magazine is designed to be a one stop resource for the outdoorsman whether he be a novice or experienced. Developed from publishing the magazine for decades, the information contained in this hardback book covers just about everything one would need for any outdoor endeavor. The five detailed sections to this book along with a multipage index are designed for those that don't want to sit in a camping ground with all the creature comforts of home, but instead go to the backcountry far from people and assistance. After a forward by Field & Stream Editor Anthony Licata and an introduction by Editor-at-Large T. Edward Nickens, it is on to the sections of the book. The first section is on â œcamping.â • After a brief introduction about the belief by T. Edward Nickens that you can separate campers into two groups--those who do just enough to get by and those who do everything letter perfect the first time (just in case)---it is on to information. From the right place to make camp, making the load of your backpack lighter, rain proofing your tent, proper cooking technique for a variety of situations, and more. This section is all about how to properly rough it while also minimizing your impact on nature. Along with detailed information and tips there are the awe inspiring pictures that make you want to throw down everything and head out the door. It is worth noting that each section is color coded and the individual pages within a section are not numbered. Instead, the tips are numbered and that same numbering system is used for the table of contents and index.â œFishingâ • comes next and starts on page 64 according to the table of contents.
