This book is the authority on teaching clinical nursing. I bought the book before I found out it was a required text in my DNP program. I designed a course for novice clinical instructors and have chosen this book as the text for the course.

Gives me ideas for post conferences.

The authors added a new chapter in the 4th edition that was so informative as I am finishing my masters in Nursing Education. Well written book and easy to understand.

Used it for a masters in nursing education class. Book was well written and informative especially if you did not have a background in education.

Using this as a text for a UW class I am taking. Very easy to read, succinct and helpful as a new Clinical Instructor.

Grad school book, just what the professor ordered.
